To contribute and grow within an encouraging and stable company that will support my development, enhance my skills, and provide opportunities for professional advancement. I'm seeking a role where I can apply my skills and Contribute to the development of innovative software solutions.

PROJECTS

Table Booking System.

- Technologies: HTML, CSS, JavaScript, PHP.
A table booking system enables to reserve tables online, view availability, and receive confirmation, enhancing the dinning experience and restaurant management.

Banking Enterprise System

Technologies : MySQL

A Banking Enterprise System built with DBMS manages customer accounts, transactions, and loans efficiently. It provides secure data handling, streamlines operations, and enhances user experience with features like balance inquiry and fund transfer.

House Price Prediction in India

Technologies: Python, NumPy, Pandas, Matplotlib, Seaborn.

House Price Prediction for India applies machine learning, enhanced with NumPy, Pandas, Matplotlib, and Seaborn, to examine location, size, and other features, helping real estate stakeholders make informed pricing decisions

Zomato Data Analysis

Technologies: Python, NumPy, Pandas, Matplotlib, Seaborn.

Analyzed Zomato data using Python, Pandas, and Matplotlib to explore restaurant names, customer ratings, pricing, and locations, revealing insights into popular dining spots and customer preferences across different cities and cuisines.
